## About this report

This report provides data about the permanent Migration Program administered by the Department of Home Affairs (the Department). This report does not include data on the permanent Humanitarian Program.

This report is published annually.

Data is sourced from several departmental visa processing and recording systems.

For privacy reasons, < 5 has been used where a number in a table is between 1 and 4.

Historical Migration Program reports are available on the Department of Home Affairs website (<https://www.homeaffairs.gov.au/research-and-statistics/statistics/visa-statistics/live/migration-program>).

## Enquiries

Any comments or enquiries concerning this report should be sent to [statistical.coordination@homeaffairs.gov.au](mailto:statistical.coordination@homeaffairs.gov.au).

## Definition of terms

Activity:	For the purposes of Migration Program reporting, this refers to visa processing activity status and includes counts of lodgements, finalisation types (grant, refusal, withdrawal) and applications onhand. Activity data may also include second stage permanent applications that do not count toward the Migration Program ceiling.
ANZSCO:	Occupation data in this report utilises the Australian and New Zealand Standard Classification of Occupations (ANZSCO). ANZSCO is a standardised classification framework for collection, publication and analysis of occupation data. Further information on ANZSCO is available on the Australian Bureau of Statistics website ( <a href="https://www.abs.gov.au">https://www.abs.gov.au</a> ).
Citizenship country:	The country of citizenship of the visa applicant or visa holder. Where a visa applicant or visa holder has more than one citizenship country, either the citizenship of the travel document or the citizenship nominated by the visa applicant is used.
Decisions:	A visa processing activity outcome where a decision-maker (including system-generated decision-making) grants or refuses a visa application.
Finalisations:	A visa processing activity outcome where a decision-maker grants or refuses a visa application, or the application is otherwise finalised by client withdrawal.
In Australia:	In this report, this term refers to the location of the client at the time the application was lodged. An applicant in Australia may already hold a visa of the same kind or may be applying for another type of visa.
Lodged:	Lodged is the count of applications receipted in a departmental office or submitted electronically.
Onhand:	A visa application that has been lodged but has not been finalised at a point in time. An application that is onhand may also be referred to as 'in the pipeline'.
Outside Australia:	In this report, this term refers to the location of the client at the time of lodging the application.
Outcome:	For the purposes of Migration Program reporting, outcome refers to the number of visas granted that count toward the Migration Program. Outcome includes primary applicants as well as secondary/dependant applicants.

Where a visa has a permanent residence pathway, eg from a provisional or 'first stage' visa to a permanent or 'second stage' visa, the applicant is counted to the Migration Program at grant of the provisional visa.

Some visas granted during a program year may not count toward the Migration Program ceiling, for example:

- If a person has been previously granted a visa which counted toward the Migration Program, that person will not be counted again.
- When a visa is granted and subsequently cancelled in the same program year, the grant is excluded for the purposes of Migration Program outcome reporting.
- When a Partner visa applicant does not progress to the second stage (permanent) visa, a place is returned to the program.
- If a Business Innovation and Investment visa (granted in an earlier year) is cancelled, a place is returned to the program in the year of cancellation.

Places:	In this report, each grant that counts toward the Migration Program outcome is a place delivered against the ceiling of Migration Program places for the year. Where referring to Migration Program <b>outcome</b> within the report, the terms 'grant' and 'place' may be used interchangeably.
Primary applicant:	The primary applicant is the person who must satisfy the primary criteria for the grant of a visa under the Migration Regulations. Also known as the principal applicant.
Secondary applicant:	Secondary applicants must satisfy the secondary criteria for the grant of a visa under the Migration Regulations. A secondary applicant is generally a dependant of the primary applicant.
Region (major):	The major geographical region in which the country of citizenship of the applicant is located. Region groupings are determined based on the Australian Bureau of Statistics Standard Classification of Countries (SACC), 2016.
Region (minor):	The minor geographical region in which the country of citizenship of the applicant is located. Region groupings are determined based on the Australian Bureau of Statistics Standard Classification of Countries (SACC), 2016.

# Background to the Migration Program

Australia's Migration Program is set annually, and runs from 1 July to 30 June of each financial year. The size and composition of the Migration Program is set each year through the Australian Government's Budget process.

There are four streams in the Migration Program:

- The **Skill stream** is designed to improve the productive capacity of the economy and fill skill shortages in the labour market, including those in regional Australia.
- The **Family stream** is predominantly made up of Partner category visas, enabling Australian citizens and permanent residents to reunite with family members from overseas.
- The **Special Eligibility stream** covers visas for those in special circumstances that do not fit into the other streams. This can include permanent residents returning to the country after a period away.
- The **Child stream** provides migration avenues for children of Australian citizens and permanent residents and is demand driven.

## Calculating the Migration Program Outcome

The Skill and Family streams include 'two-stage' visas, which provide a permanent residence pathway for visa holders from a provisional or 'first stage' visa to a permanent or 'second stage' visa. While such pathways involve the grant of two visas, to avoid double counting, the visa holder is counted to the Migration Program at grant of the provisional or 'first stage' visa only.

In addition to 'second stage' visas, some other visas granted may not count toward the Migration Program outcome in the following circumstances:

- if a person has been previously granted a visa which counted toward the Migration Program, that person will not be counted again.
- when a visa is granted and subsequently cancelled in the same program year.
- when a Partner visa applicant does not progress to the second stage (permanent) visa, a place is returned to the program.
- if a Business Innovation and Investment visa (granted in an earlier year) is cancelled under certain powers, a place is returned to the program in the year of cancellation.

# Executive Summary

The total permanent Migration Program outcome for 2020–21 was **160,052** places.

The breakdown for each of the streams within the Migration Program was as follows:

- **79,620** places were delivered in the Skill stream;
- **77,372** places were delivered in the Family stream; and
- **54** places were delivered in the Special Eligibility stream.
- The outcome of Child stream for the year was **3,006** places.

For the 2020-21 program year, the Migration Program outcome departed from a two-thirds/one-third split between the Skill and Family streams seen over recent history and moved towards a fifty-fifty split between the streams.

Overall Migration Program lodgements dropped by 9.3 per cent from 174,170 in 2019-20 to 157,989 in 2020-21.

COVID-19 had a major influence on the delivery of the Migration Program in 2020-21. The global impact of COVID-19 saw disruptions to supporting services such as English Language testing, biometrics and health and character checking. The Department took COVID-19 disruptions into account in processing throughout the year, for example in providing extended time periods for applicants to complete requirements where appropriate. The Department focussed on finalising grant ready application where possible and in line with priority processing directions. This approach has meant that refusal rates were lower than seen in previous years.

## Skill Stream

The Minister for Immigration, Citizenship, Migrant Services and Multicultural Affairs has authority to redistribute places across the Skill stream of the Migration Program in order to maximise outcomes..

Skill stream visas are processed according to government policy priorities which are outlined in Ministerial Directions. More details regarding these priorities can be found at: Skilled visa processing priorities ([homeaffairs.gov.au](http://homeaffairs.gov.au))

In 2020-21 the Skill Stream focused on visa categories which will help Australia's economy rebound from COVID-19, with priority given to visa cohorts that drive economic growth, job creation and investment into Australia. The three priority categories were:

- Business Innovation and Investment Program;
- Global Talent Program; and
- Employer Sponsored Program.

Visa processing focused on onshore applicants and applicants in critical sectors and occupations. 71.2 per cent of applicants finalised in the Skill Stream in 2020-21 were onshore.

The Skill stream outcome was 79,620 places, which accounted for 50.7 per cent of the total 2020-21 Migration Program outcome (excluding Child stream).

Within the Skill stream:

- The Employer Sponsored category had an outcome of 23,503 places. Employer Sponsored visas comprised 29.5 per cent of the Skill stream outcome in 2020–21;
- The Skilled Independent category had an outcome of 7,213 places (9 per cent);
- The Regional category had an outcome of 13,585 places (17 per cent of Skill outcome). Of this, 10,675 places were delivered in Skilled Work Regional and 2,910 places in Skilled Employer Sponsored Regional;
- The State/Territory Nominated category had an outcome of 14,268 places (17.9 per cent);
- The Business Innovation and Investment Program (BIIP) had an outcome of 11,198 places (14 per cent);
- The Global Talent category had an outcome of 9,584 places (12 per cent); and
- The Distinguished Talent category had an outcome of 269 places (0.3 per cent).

The number of places delivered to Registered Nurses (3,670) was higher than any other occupation across the Skill stream with the highest number of places delivered in the State/territory nominated (1,537) and Regional (1,353) categories for this occupation.

Skill stream lodgements decreased by 9 per cent in the 2020-21 program year compared with 2019-20. There were 94,872 first stage applications received in the Skill stream in 2020-21 compared to 104,354 first stage applications in 2019-20. This decline was mainly attributed to the State/Territory nominated and Skilled Independent categories. Lodgements increased in Global Talent category (49.3 per cent) and Distinguished Talent category (42.3 per cent) in 2020-21, compared to lodgements in 2019-20.

As at 30 June 2021, there were 97,385 first stage Skill applicants in the pipeline, an increase of 12.3 per cent compared to the pipeline as at 30 June 2020.

In the Skilled Independent category, there were 8,529 applications lodged in 2020-21 compared to 11,821 applications in 2019-20. In the Skilled Independent category, applicants located outside Australia accounted for 10.9 per cent of the 2020-21 outcome.

State and Territory Governments were able to nominate skilled migration applicants through three categories in 2020-21 – the State/Territory Nominated Category; the Business Innovation and Investment Category; and the Regional Category, through the Skilled Work Regional visa. Across these categories, Migration Program outcomes that involved a State or Territory Government nomination totalled 34,927 places, or 43.9 per cent of the Skill Stream of the Migration Program, broken down as follows:

- State/Territory Nominated – 14,268 places
- BIIP – 11,198 places
- Skilled Work Regional – 9,461 places<sup>1</sup>

There were 11,198 places delivered in the Business Innovation and Investment program (BIIP). Lodgements increased by 0.2 per cent in 2020-21, with 15,818 first stage applications made compared to 15,784 first stage applications made in 2019-20. The BIIP pipeline increased over the 2020-21 program year by 0.5 per cent, to 31,813 applicants as at 30 June 2021 compared to 31,661 applicants at 30 June 2020.

The Global Talent Visa Program made up 12 per cent of the Skill stream. The Global Talent application process firstly requires the candidate to submit an Expression of Interest (EOI). EOI candidates who meet relevant criteria, including demonstrating an international record of exceptional and outstanding achievements within a target sector, are invited to lodge a Subclass 858 Global Talent visa (renamed from Distinguished Talent on 27 February 2021).

<sup>1</sup> Excludes the number of places delivered to family sponsored applicants in the Skilled Work Regional (Provisional) visa (subclass 491)

Global Talent visa refusal rates were once again low (0.6%) for the 2020-21 program year, similar to 2019-20 (0.5%). This is a result of a pre-assessment of requirements at the EOI stage, and the increasing number of EOI candidates who are not being invited to apply for the Global Talent visa. The non-invite rate for EOIs submitted increased from 41.6 per cent in 2019-20 to 57.2 per cent in 2020-21. In the last six months of 2020-21, the non-invite rate was at 64.8 per cent<sup>2</sup>.

On 17 December 2020, the then Minister for Immigration, Citizenship, Migrant Services and Multicultural Affairs issued Ministerial Direction 89, which outlines a list of ten target sectors for priority processing under the Global Talent Visa program, and replaces the list of seven sectors prescribed by Ministerial Direction 85. The sectors under Direction no. 85 have been mapped to the sectors under Direction no. 89.

Applicants were delivered places in the following priority growth sectors:

- Digitech (34%)
- Health Industries (23%)
- Energy (17%)
- Financial Services and FinTech (12%)
- Resources (7%)
- Defence, Advanced Manufacturing and Space (6%)
- Agri-food and AgTech (0.9%)
- Infrastructure and Tourism (0.4%)
- Education (0.3%)
- Circular Economy (0.1%)

<sup>2</sup> Expression of Interest data is drawn from a dynamic environment and is correct at the time of publication. Figures may differ slightly from previous or future reporting.

## Family Stream

The Family stream) delivered 77,372 places, which accounted for 49.3 per cent of the total 2020-21 Migration Program outcome (excluding Child stream).

Within the Family stream:

- The Partner category had an outcome of 72,376 places. It comprised 93.5 per cent of the 2020-21 Family stream outcome;
- The outcome of the Contributory Parent and Non-Contributory Parent categories were 3,600 places and 900 places, respectively, a total of 4500 places; and
- The outcome of the Other Family category was 496 places.

Lodgements in the Family stream in 2020-21 were 9.4 per cent lower than in 2019-20.

The pipeline at 30 June 2021 for the Partner category was 64,111 applications, a decrease of 33.4 per cent compared to the pipeline of 96,361 at 30 June 2020.

The pipeline for the Parent category was 114,359 applications at 30 June 2021, increasing by 5.2 per cent compared to the pipeline of 108,659 applications at 30 June 2020.

The pipeline for the Other Family category was 8,712 at 30 June 2021, decreasing by 0.8 per cent compared to the pipeline of 8,785 applications at 30 June 2020.

## Special Eligibility Stream

The Special Eligibility stream outcome was 54 places, which accounted for 0.03 per cent of the total 2020-21 Migration Program outcome.

Special Eligibility includes Ministerial Intervention cases and Former Resident applicants.

## Child Stream

The Child stream delivered 3,006 places in 2020-21. The Child stream is a demand driven program, with a nominal allocation of 3,000 places.
